Epsilon Partners with France-IX to Deliver On-Demand Access to Internet Exchanges in Paris and Marseille

France-IX joins Epsilon's Global Interconnect Fabric, simplifying how Service Providers connect to key metro and subsea cable hubs

Singapore and Paris, France - May 3, 2018 – Epsilon, a privately owned global connectivity and communications Service Provider has partnered with France-IX, the leading Internet Exchange in France, to simplify and accelerate how Service Providers connect to peering points across France. Epsilon's partners can connect directly to each of the France-IX member communities in Paris and Marseille from its Infiny by Epsilon on-demand connectivity platform.

The extension of the Epsilon Infiny platform into the France-IX Paris and Marseille IXP hubs enriches its offering, so that Epsilon customers around the world can connect, from any Epsilon Point of Presence, to France-IX and its extensive peering community of several hundreds of Internet networks with significant traffic in the Internet French market.

In addition, Service Providers gain access to France-IX's IXP in Marseille, a city where 13 submarine cables land and which has become a traffic aggregation point between Europe, Africa, Middle East and Asia. This means that the end users behind those service providers in French-speaking markets across the globe benefit from greater performance and an improved customer experience.

"Our mission at Epsilon is to make accessing Internet Exchange Points across the globe simple and efficient. With Paris and Marseille, we are adding important communications hubs to our Global Interconnect Fabric and growing our Infiny on-demand connectivity platform," says Carl Roberts, Chief Commercial Officer at Epsilon. "Our partnership with France-IX will give Service Providers access to new peering partners in France and an improved end user experience when enjoying French content."

Epsilon is actively growing the number of IXPs available on its Infiny by Epsilon platform and supports the growth of peering globally. Service Providers can use Infiny by Epsilon to connect to IXPs globally from a single platform with guaranteed Quality of Service and Experience.

The France-IX platform is spread across 9 Points of Presence in Paris and 2 in Marseille. Gathering more than 380 members through 340 connected ports, with traffic peaking at 1.2 Tbps in Paris and 130Gbps in Marseille, France-IX' mission is to facilitate and ease the exchange of data, communications and transactions on the Internet in France.

"We are extremely pleased to be working with Epsilon and are looking forward to growing the France-IX community together. Epsilon is taking a step further in providing a simple, quick and easy access through its Infiny platform. With no extra Capex, no need to deploy equipment locally, any Epsilon customer can connect to France-IX in a matter of hours, instead of days or even weeks in the past. This is a major breakthrough in our industry and we are excited to make it happen thanks to Epsilon," explains Franck Simon, President at France-IX.

About Epsilon

Epsilon is a global Cloud-centric Network Service Provider, extending carrier grade connectivity services to the world's Communications and Cloud ecosystems. The company offers smart networking capabilities that combine on-demand infrastructure, automation, web-based portals and APIs to give partners friction-free access to global connectivity.

All Epsilon services are powered by a next generation hyper-scalable global backbone which connects all the leading telecoms hubs globally. Across this fabric encompasses a dense ecosystem of carriers, service operators and Cloud providers offering the leading interconnect point for a diverse set of network and connectivity requirements.

About France-IX

France-IX is the Premier Internet Peering Service Provider in France, offering public and private interconnection services through its carrier and data centre neutral exchange points in Paris and Marseille.
France-IX interconnects several hundreds of telecommunications carriers, ISPs, content providers, content delivery networks and all other Internet networks worldwide with significant traffic in the Internet French market. This enhances the affordability and latency of the Internet traffic exchanged between its members and thus improves the overall quality of the Internet in France.

Founded in June 2010 with the support of the French Internet community, France-IX is a member-based association whose core values are neutrality, sustainability and constant improvement of the Internet. For more information go to France-IX website www.franceix.net.
